About This Game

Welcome to Age of Wonders, the authentic turn based fantasy strategy classic that started the hit series. Age of Wonders' intimate atmosphere with painterly graphics still shines today. The game's fully patched up, start building your fantasy empire today!

The Age of Wonders, once a time of magic and peace. An age swept into the ravaging gale of chaos by the arrival of a single, uninvited race: the Humans. The fragile balance that existed between the ancient races, Elves, Dwarves, Orcs and others, has changed into a struggle for power and survival in the wake of the turmoil the Humans have brought to the land. Prepare for a strategy adventure where you will uncover wondrous ancient artifacts, awesome magical power, and the secrets of a shattered empire. Ally with the forces of light or darkness to determine the fate of the world in the Age of Wonders!

Key features:

- Age of Wonders is a turn-based game combining the best elements of strategy, adventure and role-playing.

-
- 12 unique fantasy races, over 50 different heroes with upgradable abilities, dozens of spells and scores of locations to explore.
 - Employ strategic and tactical skills to command troops in capturing vital locations and defeating enemies.
 - Battle your way through vast open lands, breach the outer wall in city sieges and explore deadly dungeons.
 - Forge strategic alliances with compatible races to leverage each race's unique skills and abilities.
 - Experience captivating single player campaign playable from the light and dark side.

Play multi-player games against your friends through hotseat play, play-by-email, over LAN or the Internet. The latter two modes feature an additional game play mode of simultaneous turns for a fast game pace.

This game makes me feel uber nostalgic
Played back in 2009,
But it was beta tho
Bought a full retail copy on August 2010
Man,
Orcs was the 1st civilization i played
Way back in 2009
They were so powerful and badass
My Favorite Races were
Orcs,Undead,Goblins,Humans,Highmen,Azracs
The only worst races were Lizardmen
Also this game had the best soundtracks from Love&Death,so many i even don't remember much them
But i miss march of the elves from Beta Version

This Game is Pure Nostalgia.

About our progress:

We are still working on our updated version. We are including a few new activities that should provide better opportunities for involvement. So far so good. We will keep you updated on when it will be ready.. **Hitman: Contracts Be hate Free: Interactive New Update Just Added 2.0:**

We just added the updated 2.0 version. The screen size has been increased, better UI and features to improve the daily missions. We updated the community as well with new groups and groups topics for discussions. If you already own a copy, it will update from your Steam account when you attempt to play.

Community membership is also now free so you can register and log on to take part in our discussions. We will be adding the trial version soon for download as well.. **Update coming soon...:**

We are preparing our mega update which will be quite different from the original version. Hope you like it.. **December 2018: Newsletter:**

We are making great strides on our project but we still have a lot of work ahead of us. Hopefully we will have everything ready for our estimated January 2019 Early Access release. We've been adding a few new extra features and had to delay the release. It's often hard to estimate when or if it is ready. So far, things are progressing well though. If we can't get things ready for January, I'll try to post an update and let everyone know what the situation is but it looks like we will have things ready by then.

We are constantly hard at work on this project, no breaks. It's been a life changing and emotional experience producing this project and I hope that it will make a difference in your life as much as it has ours. It's been an unbelievable journey thus far and we appreciate your patience.

With a project like this, you never know what to expect. It is quite unlike anything we've ever done but we are very excited about it. Creating something that can imply real life results is not a simple task. It is very difficult to even consider creating a project like this, especially for the Steam community. I believe it is worth the time, patience and hard work. So far, it has changed our life for the better. We hope it can do the same for you. We hope you will join us on this journey.

1. Be positive in the face of adversity or negativity.
2. STAY positive in spite of it.
3. Continue to be the difference.

Thanks again everyone.. **The future of Be hate Free Interactive:**

We just received some helpful advice from Valve's support team. We have decided to give this application more time on Steam. We want to make sure we provide a better experience for everyone so if you purchased the application, please provide your feedback and suggestions on the discussions board.

We are making some major updates to the application with new helpful features so more info soon. We are still in development so please consider that the application is still in Early Access.

Remember, this project is meant to provide the help you need. If you purchased the app, feel free to let us know what you would prefer to see or not see in our next updates.

Thanks again for all of your time and support.

*Also thank you to the support team at Valve.. **Leaving Steam...:**

We will be removing this product from Steam. We don't believe this is the best place for this application and we want to make sure we are providing something that is helpful and useful for the community. We would like to say thank you to everyone who has purchased this project and supported us. You all are great.

Keep positive, be productive and when ever possible, show love.

. **October 2018: Newsletter:**

We are making great progress! We have included more content for our program with "bonus" content that will also be included

as well. We currently do not have plans for DLCs. We want to make sure all updates and content will always be free, even for our community. If we add any DLCs it will be for sponsorship purposes.

The program looks and feels great so far. We are also working hard to include content that you can use as training tools outside of Steam (videos, resources). We hope to see your support as we will be pushing all of our efforts in this direction as a full time endeavor. Thank you for following our progress.
